behind the scenes

...quality control

Our Quality Control (QC) department is set-up with a two pronged approach- Resources Quality Control (RQC) and Production Quality Control (PGC).

The RQC team ensures all raw materials and third party components are quality checked before entering our warehouse. They are set up with a multitude of testing equipment ranging from electrical components testing through to simulated environment testing of materials. This process is applied at the design engineering and prototyping stage and also prior to the purchasing of goods for production.

The PGC team are heavily involved from the inception of the project to ensure a strong understanding of the end products function. This means a clear and defined checklist for every product from prototyping through to production, final assembly and shipment.

behind the scenes

...human resources

The most important role of our administration department is Human Resources. Carefully keeping the pulse on our business requirements it is charged with the ongoing development and day-to-day support of our work force.

Being a multi-disciplined manufacturing business, we endeavour to employ and maintain only the highest calibre of experienced staff in each of our departments.

...our work force

- established in 1997
- 6000m² manufacturing facility
- ISO 9001:2000 accreditation
- 100+ employees

in-house manufacturing

...our facility

Our continual investment in new technology and machinery is constantly growing, with our main objective to keep all manufacturing in house.

Having in-house manufacturing and ISO 9001:2000 accreditation, projects are taken from concept and converted to reality through seamless development and quality controlled production.

Our 6000m² facility is equipped with over 100 dedicated employees with knowledge and capabilities ranging from metal through to plastics, timber and printing. This means we are not restricted to any process allowing an unbiased and broad scope in achieving a result that best suits your product with lead times second to none.
